

Lockdown Leakage

Shock jolts through my heart,
A and E say tock tick Beat
But something's released.

3rdLockdown creeps on
Bloods came back clear GP says
Pylon hiss in ear

Covid kills Richard
Tingles scratch around my skull
What is going on?

Still working from home
Spoke to doctor on the phone
Vision darkening.

Keep checking Zooplar
Dr McCloud says just wait
Bear hugging my head.

Seni gets buried
Wonder, is this some Ju Ju?
Pressure pressin skull

Terry fades, film paused
GP refers a clinic
Walk like drunk sailor

Mum 90 in March

Day after day feel like this

Dad died 10 years back.

Drones view property

Waking I'm in a clogged field

Referral is lost

Nic will edit now

Smash Google for these symptoms

Fatigue , sit, lay , sleep

Umpteen zooms a day

But some still go out to play

Caught in a vortex

Walking the same streets

Not as lonely this lockdown

Halos bright my sight

Make offer on house

Shout until clinic sends date

Shake while make my food

Was it the **Pfizer**?

Strange now rules ease I am trapped

Hyacinth bulbs cent

Dom lets the cats out

Clinic doctor says I leak

As its **Cerebrospinal** fluid escaping caused by low spontaneous hypotension low pressure

Boris now pressured

But the clouds clear now I know

Caffeine lowers it.

Keys turn, things unlock

Heart it's not, it's the dura

Reads the MRI?
